"The actual mothballing effort involves controlling the long-term deterioration of the building while it is unoccupied as well as finding methods to protect it from sudden loss by fire or vandalism. This requires securing the building from unwanted entry, providing adequate ventilation to the interior, and shutting down or modifying existing utilities. Once the building is de-activated or secured, the long-term success will depend on periodic maintenance and surveillance monitoring."

KEYWORD INDEX

The following alphabetical subject list will enable the user of **MasterFormat** to find a proper location for the construction work results listed in **MasterFormat**. The references within this index are to **MasterFormat** Level 2 or Level 3 numbers. They provide a convenient means to bring the user's attention to the proper grouping of titles.

The alphabetical index does not include eight-digit numbers for Level 4 titles. Subjects which relate to a Level 4 title are referenced to the appropriate Level 3 number.

Commonly used abbreviations are included in the list. The meanings of the abbreviations can be found at the locations of the abbreviations in the six-digit number column or in the Explanation column of the master listing of titles and numbers under **Alternate Terms/Abbreviations**.

Non-preferred terms in the index are addressed by **See** references to the preferred terminology. The reference to the **MasterFormat** location is listed with the preferred term.

Important points to remember:

- The alphabetical listing refers to the title and number.
- Once the user has found the proper group for a subject, a decision must be made about what level title should be used. Titles at Levels 2, 3, or 4 may be used as appropriate.
