**MEDICAID COMMUNICATION NO. 03-07**

**DATE: February 21, 2003**

**TO:** County Welfare Agency Directors

**SUBJECT: Multi-lingual General Health Stuffer and Lead Poisoning Stuffer**

The Division of Medical Assistance and Health Services (DMAHS) has made access to quality healthcare services for children a priority. DMAHS has implemented many new initiatives that provide health education materials to the parents/caretakers of the children we serve. One of these initiatives is to deliver concise but important children's health issue messages in eight different languages. DMAHS has done this by developing the multi-lingual stuffer, *General Health* and *Lead Poisoning*.

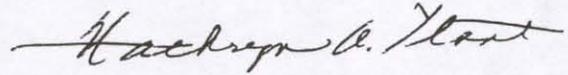

The purpose of this communication is to request that you distribute these stuffer with your next regular mailing. The multi-lingual stuffer have been forwarded to your agencies in a separate mailing. In the future, we anticipate having each stuffer mailed on an annual basis, i.e., *General Health* every April and *Lead Poisoning* every October. You will receive a Medicaid Communication regarding each of these at the time they are distributed to you.

The *General Health* stuffer advocates regular health checkups for children. Through these checkups, children will receive appropriate immunizations and will have their health monitored to prevent any future potential health problems.

The *Lead Poisoning* stuffer encourages parents/caretakers to have their children tested for blood lead. Lead poisoning continues to be a serious health problem for New Jersey's children, and a blood lead test is the only means to determine if a child has too much lead in his/her body.

I would like to thank you for your cooperation and continued support in serving our mutual beneficiaries.

Sincerely,

A handwritten signature in black ink, appearing to read "Kathryn A. Plant". The signature is fluid and cursive, with a long horizontal stroke at the beginning.

Kathryn A. Plant  
Director
