

DENNIS TOWNSHIP VISION 2030

The Villages: Community Vision Survey Results

The results of the April 25, 2009 workshop are contained in this document.

Participants were asked to rate the images they saw on how **appropriate** they were for the future of the Villages of Dennisville, South Dennisville and Seaville. Residents were asked to rate each image from -5 to +5.

- Negative numbers represent that the image is **not** appropriate for the future of the Villages .
- A zero means that the participant was **indifferent** to the image.
- Positive numbers indicate that the image was **appropriate** for the future of the Villages .

The six highest and six lowest images are shown first. They represent the six images that are **most appropriate** according to the participants for the future of the Villages . The lowest ranked numbers represent the six images that were determined to be **completely inappropriate** for the Villages.

Finally, the results for each image shown during the Community Vision Survey are included by category, ranked from highest to lowest.

The numbers show both the average and the standard deviation. For example 2.5 (2.0) means that the image received an average level of appropriateness of +2.5, with responses that varied from +0.5 to +4.5. This image would then be used to guide the consultants as they develop the Form-Based Code.
