

Grantee: New Jersey

Grant: B-13-DS-34-0002

January 1, 2022 thru March 31, 2022 Performance

Grant Number: B-13-DS-34-0002	Obligation Date:	Award Date:
Grantee Name: New Jersey	Contract End Date: 09/30/2023	Review by HUD: Original - In Progress
Grant Award Amount: \$15,000,000.00	Grant Status: Active	QPR Contact: No QPR Contact Found
LOCCS Authorized Amount: \$15,000,000.00	Estimated PI/RL Funds: \$0.00	
Total Budget: \$15,000,000.00		

Disasters:

Declaration Number

No Disasters Found

Narratives

Executive Summary:

The State of New Jersey received \$15,000,000 in NDRC funding to support the creation of regional resiliency planning programs that will help regions and communities that experience significant flooding to undergo a comprehensive planning process to identify and address vulnerabilities due to increased flooding risk. The funding will be divided between two programs:

The Regional Resiliency Planning Grant (RRPG) project will help communities prevent and address flooding events. The ultimate product of the planning process is a regional plan that identifies actions that constitute a comprehensive resiliency scenario, and implementation of appropriate policy, planning, and design activities. An additional goal of these regional adaptation action plans includes preparing communities for future funding rounds for capital projects. The RRPG program seeks to fund up to six planning projects within multi-municipal regions within the nine Sandy-impacted counties in New Jersey: Bergen, Hudson, Essex, Union, Middlesex, Monmouth, Ocean, Atlantic, and Cape May. Planning grants will fund multi-municipal regions to undergo a comprehensive process to identify and address vulnerabilities to increased flood risk, protection of environmental resources, and promotion of sustainable/smart growth development.

Additionally, a Toolkit will be created to incorporate the best practices and technical assistance learned from the development and implementation of the Meadowlands Resilience Revitalization Project. The Toolkit will share challenges and/or accomplishments on varied subjects and serve as a learning tool for both federal agencies and future grantees. Once established, the Toolkit will consist of several modules that will offer suggestions for how selected elements of the Meadowlands project can be adopted or scaled to local needs.

MID-URN Areas:

Considerable Sandy Recovery resources have been invested to improve planning for future severe weather events in communities across New Jersey. The most common beneficiaries of CDBG-DR grants have been oceanfront and bayfront communities where Sandy damage was generally more concentrated and severe.

Consequently, there is a remaining need for planning resources for inland communities dealing with riverine flooding. The planning grant program will seek to provide technical assistance and flood mapping to assist communities in adapting Resilience Adaptation Action Plans that include mitigating against future events. The planning grant program will follow the structure provided by the Disaster Relief Appropriations Act for Coastal Resilience Networks funded by the National Oceanic and Atmospheric Administration (NOAA). Currently, this resource is only available to coastal communities, leaving an unmet need in over 115 communities located in the nine most impacted and distressed counties that experience inland flooding. The two programs will seek to fund projects within multi-municipal regions within nine Sandy-impacted counties in New Jersey: Bergen, Hudson, Essex, Union, Middlesex, Monmouth, Ocean, Atlantic, and Cape May. Each multi-municipal region will be required to include a minimum of three municipalities with shared boundaries. Every effort will be made to ensure that the selected planning regions reflect the diversity of geographic and social conditions that exist in the Sandy-impacted counties. For example, flood vulnerable landscapes include:

- Urbanized Northeast which includes tidal rivers, bays and marshland in Bergen, Hudson, Essex, Union, Middlesex, Monmouth (north shore) counties;
- Mainland Atlantic Coast which includes open coast waterfronts and barrier islands in Atlantic, Cape May, Monmouth, and Ocean counties;
- Inland Suburban/Rural areas that include riverine corridors in Middlesex (western), Monmouth (inland), Ocean (northern) counties;
- Coastal Bayfront areas including the back bay areas of Atlantic, Cape May and Ocean counties, and the Delaware Bayshore which includes parts of Cape May County.

Key Agencies, Partners, Positions, Personnel:

DEP has a long history of successful collaboration with federal agencies (USACE; EPA and many others) and local governments on flood control projects. For example, DEP partners with localities on the design and funding of federal and state flood control projects. Their engineering staff members work with local government planners and leaders to formalize local funding commitments and maintenance responsibilities. Additionally, DEP staff has working relationships for the development of Statewide flood management strategies and projects with Stevens Institute of Technology, Stockton University's Coastal Research Center, Rutgers University School of Engineering, Montclair State University's Passaic River Institute, and NJ Institute of Technology's Flood Mitigation Center .

Toolkit: The team from the Bureau of Flood Resilience at DEP is responsible for the development and implementation of the Toolkit and includes Dennis Reinknecht, Manager and Alexis Taylor as Outreach Team Lead Leader. In addition to the leading the development of the NDR Toolkit, Dennis and Alexis are part of the Rebuild by Design team tasked with managing the Hudson River and Meadowlands Flood Projects \$380 million of CDBG-DR funding. They will be supported by several qualified staff.

Resiliency Planning Grant Program: This team from the Office of Coastal and Land Use Planning at DEP (OCLUP) administers the planning and enhancement of the Coastal Management Plan (CMP). OCLUP staff develops and implements long range planning projects, and coordinates with complementary programs and initiatives in the coastal area. This team will be under the direction of Elizabeth Semple, Manager. Ms. Semple led the development of the State's Storm water Management Rules and all aspects of the OCLUP for the past 8 years. In addition to other qualified personnel, the team will include Nicholas Angarone, Research Scientist - NJ licensed and nationally certified Professional Planner. Nick has led a team to develop and implement sustainability and resiliency programs for past 8 years and manages several federal planning grants.

Overall Progress Narrative:

Summary of National Disaster Resilience project for First Quarter 2022:
 New Jersey's National Disaster Resilience (NDR) project is focused on helping communities assess their repetitive flooding risks and then develop solutions such as building codes and plans that can be implemented to counter those risks. The State will continue accomplishing this through two initiatives: Resilient NJ (RRPG) and the Resiliency Toolkit. Four RRPG regional planning teams were selected to receive grant awards of up to \$200,000 each to identify and implement

innovative solutions to coastal and river flooding.

The teams and their partners are:

- Northeast NJ-Arcadis Project Team – Jersey City, Newark, Hoboken, Bayonne, the HOPES Community Action Partnership, and the Ironbound Community Corporation.
- Raritan River and Bay Area (Middlesex County)-Arcadis Project Team – Middlesex County Office of Planning, Old Bridge, Perth Amboy, Sayreville, South River, Woodbridge, and the Lower Raritan Watershed Partnership.
- Long Beach Island-Kleinfelder Project Team – Long Beach Township, Barnegat Light, Beach Haven, Harvey Cedars, Ship Bottom, Surf City, and the Long Beach Island Community Center.
- Ventnor (Atlantic City region)-WSP USA Solutions Project Team – Brigantine, Atlantic City, Ventnor, Margate, Longport, Northfield, Pleasantville, Atlantic County, and the American Red Cross.

In the first quarter of 2022, the Northeast NJ-Arcadis Project Team coordinated and conducted two community engagement meetings, coordinated with the team’s community-based organization for Spanish language break-out sessions, captured flood information for the region from social media postings, and updated the project website.

In the first quarter of 2022, the Raritan River and Bay Area (Middlesex County)-Arcadis Project Team coordinated community engagement and steering committee meetings, captured flood information for the region from social media postings, identified and addressed issues with risk assessment modeling, and conducted a scenario development workshop.

The Ventnor (Atlantic City region)-WSP USA Solutions Project Team in the first quarter of 2022 conducted various meetings with the steering committee and stakeholders and engaged in numerous activities, including editing of the final Planning Context Report, coordinating the focus group survey, and sea level rise storm scenario visualization and mapping. The team refined the asset inventory and continued to update the project website.

The Long Beach Island-Kleinfelder Project Team in the first quarter of 2022 held various meetings with the team’s community-based organization to discuss and execute the community visioning workshops, prepared marketing materials and press releases in English and Spanish for the workshops, identified community assets at risk of flooding, revised the flood risk assessment methodology, and prepared a GIS database of the region.

Enterprise Community Partners, Rutgers University, and Stevens Institute of Technology, which are the three non-governmental organizations engaged in previous quarters, are working on their particular projects to provide support to the RRP program:

1. In the first quarter of 2022, Enterprise Community Partners’ project grant was closed after it submitted its final deliverables, consisting of a community engagement tool and adaptive capacity strategies for communities to respond to climate change.
2. Rutgers University continued developing the content, including visual aids, for the guidance document, “Beyond Acquisition and Demolition - A Community Primer Ecological Restoration of Flood Prone Landscapes,” based upon the outline confirmed by the review committee and has compiled and organized the literature review in the first quarter of 2022.
3. Stevens Institute of Technology received the grant award to refine the existing living shorelines design guidelines with further consideration of urban environments. In the first quarter of 2022, Stevens continued reviewing the international guidance document on nature-based features for flood risk management and identifying gaps in the current guidelines, extracting information related to the design and performance of urban eco-shorelines, and continued writing the Urban Eco-Shoreline Design Guidelines.

The NDR Resiliency Toolkit team has completed both Module 1, Operations and Maintenance, and Module 2, Workforce Development. In the first quarter of 2022, development of Module 3, Decision Support System, or DSS, continued. Module 3 is the final module of the toolkit. It is a GIS mapping-based decision support system to identify social economic and ecological key performance indicators that should be considered in selected coastal resilience projects in the nine most impacted and distressed counties.

Activity Description:

Funding to regions to undergo a comprehensive planning process to identify and address vulnerabilities to increased flood risk, protection of environmental resources and promotion of sustainable/smart growth development.

Location Description:

Counties: Atlantic, Bergen, Cape May, Essex, Hudson, Middlesex, Monmouth, Ocean, and Union.

Activity Progress Narrative:

NDR-DEP-RRPG-Northern NJ Region In this quarter, 146,246.75 was expended on planning, coordinating, and conducting two (2) community engagement meetings, coordination with community-based organization for Spanish break-out sessions, capturing flood information for the region from social media postings, and updating the project website. NDR-DEP-RRPG Raritan River Region (Arcadis RRBR) In this quarter, 138,859.50 was expended conducting engagement coordination and steering committee meetings, capturing flood information for the region from social media postings, identifying and addressing issues with risk assessment modeling, and

conducting a scenario development workshop. NDR-DEP-RRPG-Long Beach Island Regional In this quarter, 240,670.59 was expended on various meetings with the community-based organization to discuss and execute the community visioning workshops, prepared marketing materials and press release in English and Spanish for the workshops, identified community assets at risk of flooding, revised the flood risk assessment methodology, and prepared a Geographic Information System (GIS) database of the region. NDR-DEP-RRPG-Atlantic County Coastal Region (WSP) In this quarter, 215,942.97 was expended on various engagement coordination and steering committee meetings, risk assessment modeling refinements, review and revision of maps, planning for scenarios workshops, GIS data processing, and updating the website.

Activity Description:

Lessons learned from the resiliency planning grant program will be synthesized into a toolkit to assist communities across the state and nation that face similar challenges, facilitating replicability of the State's NDR project and the multi-sector approach to assessing resilience investment. Over the term of the project, at least four modules in the toolkit will be developed and available for replication.

Location Description:

Counties: Atlantic, Bergen, Cape May, Essex, Hudson, Middlesex, Monmouth, Ocean, and Union.

Activity Progress Narrative:

Costs incurred this quarter totaling 53,469.86 reflect DEP staff equipment and invoices of the consultant team who are developing module 3 of the Toolkit.

Overall	This Period	To Date
Match Funds	\$ 0.00	\$ 0.00

Activity Description:

Funding set aside to fund administrative activities related to Toolkit development. Lessons learned from the resiliency planning grant program will be synthesized into a toolkit to assist communities across the state and nation that face similar challenges, facilitating replicability of the State's NDR project and the multi-sector approach to assessing resilience investment. Over the term of the project, at least four modules in the toolkit will be developed and available for replication.

Location Description:

Counties: Atlantic, Bergen, Cape May, Essex, Hudson, Middlesex, Monmouth, Ocean, and Union.

Activity Progress Narrative:

Accomplishments Performance Measures
