Bear Hunting

**Regulations**

**The Black Bear** hunting season consists of two separate segments, A and B. Segment A is October 8–13, 2018. The season bag limit is one bear per permit, but only one bear may be taken per segment, regardless of the number of permits the hunter holds. In total, a hunter with valid permits may harvest up to two bears, one in each segment.

**Black Bear Hunting Permits**

A total of 11,000 black bear hunting permits, allocated by bear management zone, will be available to properly licensed hunters and farmer hunters. These permits are valid for the entire black bear hunting season, including Segment A in October and Segment B in December. A hunter may not possess more than two unfilled permits at any time during the entire season; these permits must be for different zones.

If no bear is taken during Segment A, the permit(s) is still valid for hunting in Segment B. If a hunter harvests a bear during Segment A, that permit is no longer valid, though the hunter may purchase a replacement permit for that same zone to use during Segment B, if available when permit sales re-open on Nov. 1. Hunters who purchase only one permit prior to the end of Segment A, and do not harvest a bear during Segment A, may continue to use that permit during Segment B, plus may purchase a second permit after Nov. 1 for a different zone.

Hunters who purchase two permits prior to the end of Segment A and do not fill either permit during Segment A may NOT purchase a third permit when permit sales reopen in November.

Permit sales are broken into two periods: 10 a.m. on Sept. 10–Oct. 13 and again beginning at 10 a.m. on Nov. 1 until the end of the season or until permit quotas are reached. Hunters are strongly urged to purchase permits during the early sales period. Permits can be purchased at licenses agents or online.

For permit application process, changes, status check and to claim your permit, see details on page 11.

Following commencement of the black bear season, the Fish and Wildlife Director may announce closure of the entire season or extension of Segment B of the season based upon data obtained and reviewed by Fish and Wildlife. A season closure, if announced, will become effective 24 hours from the daily legal closing time of the day on which the decision is made. The dates of a Segment B

---

**Don’t Wait to Buy Bear Permits!**

The lottery for bear permits has been eliminated. All hunters (especially hunters who plan to hunt only in Segment B) are strongly encouraged to purchase their permit(s) during the September—October sales period rather than wait until permit sales reopen on November 1 since bear permits may sell out in some zones before the Segment A hunting period ends.

The Black Bear hunting season consists of two separate segments, A and B. Segment A is October 8–13, 2018. The season bag limit is one bear per permit, but only one bear may be taken per segment, regardless of the number of permits the hunter holds. **Remember these shot placement images and make wise decisions for a successful harvest!**

**Essential Black Bear Bowhunting Strategies**

Improve your black bear hunting success while showing respect for the wild game you pursue. Be prepared to make a quick, clean harvest.

- **Hunters must ONLY take high-percentage shots.**
- Keep all shots **within 20 yards.**
- Shoot **only** when a bear is standing **on all fours,** broadside or slightly quartering away.
- The front leg **must be extended forward** to create access to the vital area.
- Black bear’s long hair and thick belly fat make it more difficult than with a deer to determine the location of the vital zone.

See Black Bear Hunting Tips — Including Bowhunter Info! on page 53. Other important black bear hunting FAQs are answered on our website at NJFishandWildlife.com/bearseason_faq.htm.

---

**Black Bear Shot Placement Guide**

The quartering-away position offers the best lethal approach. Further behind the shoulder is the best aiming spot. Avoid a shot that will hit the paunch area.

| Gun or Bow | Wait for this near front leg to move forward like the image shown at left. |

See Black Bear Hunting Tips — Including Bowhunter Info! on page 53. Other important black bear hunting FAQs are answered on our website at NJFishandWildlife.com/bearseason_faq.htm.
Bear Hunting

REGULATIONS

Firearms, Bows and Ammunition Legal for Bear Hunting

Shotgun (Segment B only): not smaller than 20 gauge nor larger than 10 gauge with rifled slugs and capable of holding not more than three rounds. Lead, lead alloy or copper rifled slug or sabot slug. Buckshot is prohibited.

Muzzleloader Rifle (only during the last three days of Segment A plus all of Segment B): must be single-barrel, single shot rifles not less than .44 caliber. Flintlock, percussion and in-line ignitions are allowed. Double barrel muzzleloaders prohibited. Persons hunting with a muzzleloader rifle must also possess a current and valid rifle hunting permit.

Archery Equipment: (Segment A only) Bows used for bear hunting (long, recurve, compound or crossbow) must have a minimum draw pull weight of 35 pounds at the archers draw length (long and recurve bow) or peak weight (compound bow), or 75 pounds minimum draw weight for a crossbow. Arrows must be fitted with a well-sharpened metal broadhead with a minimum width of 3/4 inch.

Additional Black Bear Hunting Regulations

- Firearm black bear hunters must wear a hat of solid fluorescent orange or an outer garment containing at least 200 square inches of fluorescent orange material visible from all sides at all times while bear hunting and all bear hunters must follow the fluorescent orange requirements pertaining to hunting from a ground blind as specified under Hunter Orange, page 27. During the last three days of Segment A, bowhunters in treestands should consider wearing hunter orange.

- It shall be illegal to use dogs to pursue or run black bears.

- No person shall attempt to take or kill a black bear or have in their possession or control any firearm, bow or other weapon of any kind, while elevated in a standing tree or in a structure of any kind within 300 feet of a baited area. On national wildlife refuges and at the Delaware Water Gap National Recreation Area, the distribution of bait and/or hunting over bait is prohibited. Hunters should also check with the landowner or administrative agency before placing bait on any hunting area.

- Allowable hunting methods: stand hunting, still-hunting or drive hunting.

- Hunters using or possessing any shotgun slug in the field during the bear seasons must have a shotgun with adjustable open iron or peep sights or a scope affixed to the shotgun.

- Telescopic sights of any magnification (scope power) are permitted for bear hunting on all firearms (including muzzleloading rifles) and also on crossbows.

- Shotgun shells containing single spherical projectiles referred to as pumpkin balls are prohibited.

- While bear hunting with a shotgun, it is illegal to have in possession any ammunition not authorized for bear hunting.

Black Bear Hunting on State Lands

- Baiting is prohibited within 450 feet of campsites and picnic areas in all state parks and forests to coincide with the bear management policy for these areas. Learn these locations BEFORE you hunt.

- Hunting is prohibited in the Cedar Swamp Natural Area at High Point State Park due to sensitive wetland habitat that could be impacted by going off trail in this area.

- ATV use is prohibited in state parks, forests and wildlife management areas. However, hunters might be permitted to use ATVs to retrieve a bear but only with approval from, and on a pathway approved by, the park superintendent or designee (for state parks and forests) or from Fish and Wildlife’s regional Law Enforcement office (for assistance on wildlife management areas).

No bears were harvested in the portions of Mercer and Somerset counties open to bear hunting in 2017.

Note:

See callout box on page 12 to change your lottery application or to check your permit application status online!

- Only one muzzleloader rifle may be in possession while bear hunting.
- All firearms must be cased and unloaded while being transported in vehicles.
- It is illegal to take or attempt to take a bear in a den structure.
Black Bear Management Zones
Map for general reference only.
For a complete description of the Black Bear Management Zones, scan this QR code or see Fish and Wildlife’s bear management zone webpage at NJFishandWildlife.com/bearzonemap.htm.

After Harvesting a Bear—Mandatory Bear Check Requirement
Properly licensed hunters who harvest a black bear shall immediately complete and affix to the bear the “Black Bear Transportation Tag” from their Black Bear Hunting Permit. Information included on the black bear transportation tag shall include: the hunter’s name, address, Conservation ID number; date and time of kill; nearest road, county and municipality of kill; and the sex of the black bear. When field dressing a black bear, leave the sex organs intact and attached to the body. A harvested black bear may be quartered and brought out of the field in sections, provided all parts are brought to the check station at the same time.

Successful hunters must take the black bear to a designated check station on the day of the kill by 9 p.m. during Segment A or by 7 p.m. during Segment B. Hunters shall surrender the black bear transportation tag and will be issued a legal possession seal.

Any legally killed black bear recovered too late to be brought to a designated black bear check station by the check station closing time on the date of the kill must be reported immediately by telephone to the Northern Region Office, Bureau of Law Enforcement (908) 735-8240. On the telephone message recording device, hunters must leave their name, address and a telephone number where they can be reached. The harvested black bear must be brought to a designated black bear check station on the next weekday to be registered and to receive a legal possession seal.

Mandatory Black Bear Check Stations
In the event of a season extension, check station information will be announced via the permit hotline (609) 292-9192, news release, and on Fish and Wildlife’s website NJFishandWildlife.com.

Hours
Segment A: 9 a.m. to 9 p.m.  Segment B: noon to 7 p.m.

Warren County
• Pequest Wildlife Management Area
  605 Pequest Road, Oxford

  Rt. 615 (Walpack Rd.), Sandyston
• Whittingham WMA
  148 Fredon-Springdale Rd., Newton
  * Operating Opening Day and Saturday during Segment A only.
  ** Operating all week during Segment A plus operating only on Opening Day and Saturday during Segment B.

Black Bear Game Care
As when cooking any raw meat, care must be taken to prevent exposure to disease when consuming wild game. Black bear are known to carry Trichinella, a parasite commonly associated with pork. States nationwide report incidents of bears infected with Trichinella and New Jersey is no different. A Trichinella infection (Trichinellosis) is a risk only if the meat is cooked improperly. To ensure bear meat is safe to eat, be sure it is cooked to an internal temperature of 170 degrees for at least 15 seconds.

Toxoplasmosis, most commonly associated with cats, is another parasitic disease that may be transmitted to humans if meat is not handled properly. To eliminate any health risks associated with Toxoplasmosis make sure no one who may be pregnant handle raw bear meat and always cook the meat thoroughly as you would for Trichinella. If you follow these simple guidelines you can enjoy your bear meat without any concern for exposure to Trichinella or Toxoplasmosis.

Note: Black bear management zones are different than deer management zones. Choose carefully when purchasing a black bear permit. For the 2018 season, only zones 1–5 are open for hunting.
